Over the Counter Medication Form

In accordance with the licensing regulation of the Department of Human Services concerning the dispensing of over-the-counter medications in a childcare care facility, MVM is required to have a physician's authorization for each child indicating which over-the-counter medications can be given and the amounts and times to be given. We are not able to give any over-the-counter medication (including tylenol, benedryl, ibuprofen, cough drops or homeopathic remedies) without this authorization from a physician.

Please have your child's doctor sign the consent form below for over the counter medications. With this form and parent authorization we will be able to administer over the counter medications as needed.

Thank you for your cooperation!

My patient _____ may receive the following over the counter medications as directed on the label for appropriate weight/age and frequency of administration.
